### DETAILED ACTION

1. This Office Action is in response to the Amendment filed on January 17, 2006. Claims 1 and 12 are amended. Claims 9, 17, and 28 are canceled.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-7, 10-15, and 18-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Dominissini et al., US Patent 6,889,999 B2.

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

In regards to claims 1-7, 9-15, 17-20 and 28 Dominissini et al. show a system (10) for maintaining an inflatable cushion in a folded condition. The system comprised of an inflatable chamber means (22), a tab means (32) having a head and a narrow neck, the tab being attached to the chamber (30, 22), and a supporting member means (34) with an aperture (36) having a width less than the width of the head. The supporting member (34) applies an inward compressive force to the chamber (22) to retain the chamber in a folded condition. Dominissini et al also show, the supporting member (34) being integrally formed with the chamber (22); the supporting member (34) surrounding the chamber (22); the supporting member (34) being an elongated strip; a tear seam (44) in the supporting member permitting deployment of the chamber (22); the supporting member (34) being made from flexible material; the tab having an

Art Unit: 3616

opening (48) that permits attachment of the chamber (22) to a vehicle (20); the system (10) wherein the tab (32), chamber (22), and supporting member (34) are integrally formed; and the tab (32) being of a substantially rigid material. The system is shown to further include a second tab (32) attached to the chamber (22) and a second supporting member (34) having an aperture (36), wherein the second supporting member (34) applies an inward compressive force to the chamber (22) to retain the chamber (22) in a folded condition when the second tab (32) interlocks with the aperture (36) of the second support member (34).

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
6. Claims 8 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dominissini et al., US Patent 6,89,999 B2. Dominissini et al. disclose the supporting member to be made from a flexible material, but does not show the supporting member to be made from fabric. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have the supporting member made from fabric so as to allow the supporting member to be easily adapted to various vehicles, and as it

has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice.

***Allowable Subject Matter***

7. Claims 21-27 are allowed.

***Response to Arguments***

8. Applicant's arguments filed January 17, 2006 have been fully considered but they are not persuasive. In regards to the "tab being attached to the chamber", the tab surrounds and engages the chamber and is thereby attached to the chamber.

***Conclusion***

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
